

RV College of Engineering®

Mysore Road, RV Vidyaniketan Post,
Bengaluru - 560059, Karnataka, India

Go, change the world®

MASTER OF COMPUTER APPLICATIONS

SCHEME AND SYLLABUS OF I TO II
SEMESTER 2024 SCHEME

VISION

Leadership in Quality Technical Education,
Interdisciplinary Research & Innovation, with a Focus on
Sustainable and Inclusive Technology

MISSION

1. To deliver outcome based Quality education, emphasizing on experiential learning with the state of the art infrastructure.
2. To create a conducive environment for interdisciplinary research and innovation.
3. To develop professionals through holistic education focusing on individual growth, discipline, integrity, ethics and social sensitivity.
4. To nurture industry-institution collaboration leading to competency enhancement and entrepreneurship.
5. To focus on technologies that are sustainable and inclusive, benefiting all sections of the society.

QUALITY POLICY

Achieving Excellence in Technical Education, Research and Consulting through an Outcome Based Curriculum focusing on Continuous Improvement and Innovation by Benchmarking against the Global Best Practices.

CORE VALUES

Professionalism, Commitment, Integrity, Team Work, Innovation

RV College of Engineering®

Mysore Road, RV Vidyaniketan Post,
Bengaluru - 560059, Karnataka, India

Go, change the world®

Scheme & Syllabus of
I & II Semester

2024 SCHEME

MASTER OF COMPUTER
APPLICATIONS

MASTER OF COMPUTER APPLICATIONS

DEPARTMENT VISION

Pioneering in ICT Enabled Quality Education and Research with a focus on Sustainable and Inclusive Applications

DEPARTMENT MISSION

1. To adapt novel methodologies for quality education through experiential learning.
2. To empower students with continuous, holistic education, emphasizing on discipline, ethics and social commitment.
3. To become a vibrant knowledge center for research and software development.
4. To continuously build capacity steering towards industry- institute collaborative research and entrepreneurial competencies.
5. To utilize and develop free and open source software tools for sustainable and inclusive growth.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

- PEO1** Practice software engineering principles and standards to develop software to meet customer requirements across verticals
- PEO2** Contribute to build sustainable and inclusive applications using mathematical, simulation and meta heuristic models
- PEO3** Demonstrate entrepreneurial qualities through individual competence and team work
- PEO4** Achieve successful professional career with integrity and societal commitments leading to lifelong learning

PROGRAM SPECIFIC OUTCOMES (PSOs)

- PSO1** Solve real world computing system problems of various industries by understanding and applying the principles of mathematics, computing techniques and business concepts
- PSO2** Design, test, develop and maintain desktop, web, mobile and cross platform software applications using modern tools and technologies

GLOSSARY OF ABBREVIATIONS

1.	AS	Aerospace Engineering
2.	BS	Basic Sciences
3.	BT	Biotechnology
4.	CH	Chemical Engineering
5.	CHY	Chemistry
6.	CIE	Continuous Internal Evaluation
7.	CS	Computer Science & Engineering
8.	CV	Civil Engineering
9.	EC	Electronics & Communication Engineering
10.	EE	Electrical & Electronics Engineering
11.	EI	Electronics & Instrumentation Engineering
12.	ET	Electronics & Telecommunication Engineering
13.	GE	Global Elective
14.	HSS	Humanities and Social Sciences
15.	IM	Industrial Engineering & Management
16.	IS	Information Science & Engineering
17.	L	Laboratory
18.	MA	Mathematics
19.	MBT	M. Tech in Biotechnology
20.	MCE	M. Tech. in Computer Science & Engineering
21.	MCN	M. Tech. in Computer Network Engineering
22.	MCS	M. Tech. in Communication Systems
23.	MDC	M. Tech. in Digital Communication
24.	ME	Mechanical Engineering
25.	MHT	M. Tech. in Highway Technology
26.	MIT	M. Tech. in Information Technology
27.	MMD	M. Tech. in Machine Design
28.	MPD	M. Tech in Product Design & Manufacturing
29.	MPE	M. Tech. in Power Electronics
30.	MSE	M. Tech. in Software Engineering
31.	MST	M. Tech. in Structural Engineering
32.	MVE	M. Tech. in VLSI Design & Embedded Systems
33.	N	Internship
34.	P	Projects (Minor / Major)
35.	PHY	Physics
36.	SDA	Skill Development Activity
37.	SEE	Semester End Examination
38.	T	Theory
39.	I	Theory Integrated with Laboratory
40.	VTU	Visvesvaraya Technological University

**POST GRADUATE PROGRAMS**

Sl. No	Core Department	Program	Code
1.	BT	M. Tech in Biotechnology	MBT
2.	CS	M. Tech in Computer Science & Engineering	MCE
3.	CS	M. Tech in Computer Network Engineering	MCN
4.	CV	M. Tech in Structural Engineering	MST
5.	CV	M. Tech in Highway Technology	MHT
6.	EC	M. Tech in VLSI Design & Embedded Systems	MVE
7.	EC	M. Tech in Communication Systems	MCS
8.	EE	M. Tech in Power Electronics	MPE
9.	ET	M. Tech in Digital Communication	MDC
10.	IS	M. Tech in Software Engineering	MSE
11.	IS	M. Tech in Information Technology	MIT
12.	ME	M. Tech in Product Design & Manufacturing	MPD
13.	ME	M. Tech in Machine Design	MMD
14.	MCA	Master of Computer Applications	MCA

**INDEX**

SEMESTER: I			
Sl. No.	Course Code	Course Title	Page No.
1.		Discrete Mathematics and Probability Theory	01
2.		Web Application Development	03
3.		Object Oriented Programming using Java	06
4.		Professional Elective-A	09
5.		Skill Lab	16
6.		Technical English	18
7.		Bridge Course Mathematics	19

INTEGRATED PROFESSIONAL ELECTIVE- A			
Sl. No.	Course Code	Course Title	Page No.
1.		Data Science	09
2.		Computer Networks	13

SEMESTER: II			
Sl. No.	Course Code	Course Title	Page No.
1.		Modern Application Development	21
2.		Design and Analysis of Algorithms	24
3.		Agile Software Development	26
4.		Professional Elective-B	28
5.		Professional Elective-C	43
6.		Research Methodology (Online)	52
7.		Design Thinking lab	53
INTEGRATED PROFESSIONAL ELECTIVE- B			
1.		Data Analytics	28
2.		Business Intelligence & Visualization	32
3.		Internet of Things	36
4.		Cloud Computing	40
PROFESSIONAL ELECTIVE-C			
1.		Cyber Security and Blockchain	43
2.		GenAI	45
3.		Extended Reality	47
4.		Software Testing	49

SEMESTER: I					
Course Code	:		DISCRETE MATHEMATICS AND PROBABILITY THEORY	CIE Marks	: 100
Credits L-T-P	:	3-1-0	(Theory)	SEE Marks	: 100
Hours	:	45L+30T+45EL	(Professional Core Course)	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Graph Theory: Definition and examples of graphs, properties of a graph, sub graphs, regular graphs, bipartite graphs, paths and cycles, operations on graphs (union, intersection, Cartesian product), isomorphism of graphs. Eulerian graphs, Hamiltonian graphs, directed graphs, in degrees and out degrees in digraphs. Travelling salesman problem.					
UNIT - II					9 Hours
Logic: Basic connectivity and Truth table, Logical equivalence, logical implications, Quantifiers – Predicates: Predicative logic, Free and Bound variables, Rules of inference, Consistency. Proofs of theorems-direct, indirect, and proof by contradiction.					
UNIT - III					9 Hours
Number Theory: Divisibility, the greatest common divisor, properties of prime numbers, the fundamental theorem of arithmetic, modular arithmetic, remainder arithmetic, multiplicative inverses and cancelling, Euler's theorem. RSA Public key encryption.					
UNIT - IV					9 Hours
Statistics and Probability theory: Curve fitting by method of least squares, fitting of curves – polynomial, (exponential, power function). Correlation and linear regression analysis. Basic concepts of probability, conditional probability, Bayes' theorem.					
UNIT - V					9 Hours
Probability Distributions: Random variables- discrete and continuous, probability mass function, probability density function, and cumulative density function. Binomial distribution, Poisson distribution, Exponential distribution, and Normal distribution.					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Explore the fundamental concepts of graph theory, logic, number theory, statistics, and probability theory.			
CO2	:	Apply theoretical concept of graph theory, logic, number theory, statistics, and probability theory for different domains in optimization, data science, cryptography and machine learning.			
CO3	:	Analyze the solution of the modern engineering problems solved using appropriate techniques of graph theory, statistics, and probability theory to optimize the solutions of engineering problem.			
CO4	:	Develop the overall mathematical knowledge gained to demonstrate and analyze the Problems arising in real world situations.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks]**

Sl.No.	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO TESTS will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS. Students should score minimum 40% in TEST to clear CIE	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS.	40
	MAXIMUM MARKS FOR THE CIE	100

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)

Q.NO.	CONTENTS	MARKS
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	100

SEMESTER: I					
Course Code	:		WEB APPLICATION DEVELOPMENT	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Core Course with Integrated Lab)</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Mark-up Language: HTML5 tags- Formatting, Commenting, Code, Anchors, Backgrounds, Images, Hyper-links, Lists, Tables, Semantic Elements in HTML, Multimedia, Forms Front End Design: Cascading Style Sheet (CSS): Introduction to CSS – Basic syntax and structure, In-line Styles, Embedding Style Sheets, Linking External Style Sheets, Backgrounds, manipulating text, Margins and Padding, Positioning using CSS					
UNIT - II					9 Hours
Deep customization of Bootstrap: Using the Base CSS: Implementing the Bootstrap Base CSS, Headings, Body copy, Typographic elements, Emphasis inline elements, Alignment classes, Emphasis classes, Addresses, Blockquotes, Abbreviations, Lists, Tables, Basic styling, Buttons, Forms, Inline forms, Horizontal forms, Code, Images, Font families. Basics of JavaScript: Overview of JavaScript, Object orientation and JavaScript, Syntactic characteristics, Primitives, operations, and expressions, Screen output and keyboard input, Control statements, Object creation and modification, Arrays, Functions, Constructors, Pattern matching using regular expressions					
UNIT - III					9 Hours
Introduction to Databases: Database Languages and Architecture: Introduction to data, information, databases, database management system; Characteristics of database approach, Data models, Schema and instances, Three schema architecture and Data Independence, Database Languages and Interfaces, Database System Environment, Centralized and Client/Server Architectures of DBMSs Conceptual Data Modeling: A Sample Database Application, Entity Types, Entity Sets, Attributes, Relationship Types, Relationship Sets, Roles, and Structural Constraints, Weak Entity Types, Refining the ER Design for the Company Database, ER Diagrams, Naming Conventions, and Design Issues					
UNIT - IV					9 Hours
Structured Query Language: Data Definition and Data Types, Specifying Constraints in SQL, Basic Retrieval Queries in SQL, INSERT, DELETE, and UPDATE Statements in SQL, More Complex SQL Retrieval Queries- Nested Queries, Tuples, and Set/ Multi set Comparisons, exists and unique, join tables and outer joins, aggregate functions, Schema Change Statements in SQL					
UNIT - V					9 Hours
Relational Model: Relational Model Concepts, Relational Model Constraints and Relational Database Schemas and Keys, Update Operations, Transactions, and Dealing with Constraint Violations, Relational Database Design Using ER-to-Relational Mapping Normalization: Informal Design Guidelines for Relation Schemas, Functional Dependencies, Normal Forms Based on Primary Keys, General Definitions of Second and Third Normal Forms, Boyce-Cod Normal form					
LABORATORY					30 Hours

1. Design a static web portal using HTML5 semantic elements and Bootstrap of online book stores. The website should consist the pages like. Home page, User profile page, Books catalogue etc
2. Demonstrate usage of HTML5 and JavaScript DOM to manipulate content dynamically on an inventory management webpage designed using HTML5 and customized Bootstrap
3. Develop a registration form using HTML5 and customized Bootstrap. Validates user input using regular expressions (RegEx)
4. Design, Create and Implement the relational databases for any one of the Domains like Tourism, Human Resource Management, Debris Management and Others
5. Design, Create and Implement the relational databases for any one of the Domains like Health Care, Energy, Agriculture, Telecom and others

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Apply the basic constructs of the web programming and database concepts
CO2	:	Determine and compare the relevant components that can be applied to a given problem
CO3	:	Design and implement the web and database solutions for the given scenario
CO4	:	Analyze the web and database components in building an application

SEMESTER: I					
Course Code	:		OBJECT ORIENTED PROGRAMMING USING JAVA	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Core Course with Integrated Lab)</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Object Oriented Design: Introduction to Object-Oriented Concepts, How to Think in Terms of Objects, The Anatomy of a Class, Class Design Guidelines. Designing with Objects Inheritance: Mastering Inheritance and Composition, Designing with Interfaces and Abstract Classes, Building Objects and Object-Oriented Design, categories of Design Patterns, The SOLID Principles of Object Oriented Design.					
UNIT - II					9 Hours
Java Programming Fundamentals: Introduction to Java Programming, Applications of Java Programming, The Java Development Kit, The Java Keywords, Identifiers in Java, User input using Scanners, The Scope and Lifetime of Variables, operators, Conditional and Control Statements, Arrays, String Handling, Classes, Objects and Methods: How Objects are Created, Reference Variables and Assignment, Methods, Returning from a Method, Returning Value, Using Parameters, Constructors, this Keyword, Understanding Static.					
UNIT - III					9 Hours
Inheritance, Interface, Packages: Inheritance: Fundamentals, Overloading, Overriding, super keyword, Using final. Interface: Fundamentals, Creating an Interface, Implementing an Interface, Using Interface References, Implementing Multiple Interfaces. Package: Fundamentals, Importing Packages, Creating user defined packages					
UNIT - IV					9 Hours
Exception Handling: Exception Handling: Fundamentals, Hierarchy, Catching subclass Exceptions, try blocks can be nested, Throwing an Exception, Throwable, using finally, Java's Builtin Exceptions Threads: The Thread Class and Runnable Interface, Creating Thread, Creating Multiple Threads, Thread Priorities, Synchronization, using Synchronization Methods, Thread Communication using notify (), wait () and notify All(), suspending, Resuming and stopping Threads					
UNIT - V					9 Hours
Collections framework: Collections Overview, The collection Classes. Generics: Generics Fundamentals Bounded Types, Generic Methods, Generic Constructors, And Some Generic Restrictions. RESTful API: Java APIs For JSON Processing, Introduction to the Basics of RESTful Architecture Design Strategy, Guidelines, Best Practices.					

LABORATORY		30 Hours
<p>Write a Java program to demonstrate the following concepts</p> <ol style="list-style-type: none"> 1. a. scope of variable b. this keyword 2. a. constructor overloading and method overloading b. static keyword 3. The concepts of packages 4. a. Abstraction b. Run Time Polymorphism 5. Multiple interfaces 6. User defined Exception Handling using throw, throws 7. Thread Life Cycle 8. Producer & consumer design pattern using thread wait & notify methods. 9. Generic classes and methods <p>Develop a RESTful web API for a portal that allows access to web resources via REST URIs, demonstrating the use of HTTP methods such as GET, POST, PUT, and DELETE</p>		
Course Outcomes: After going through this course the student will be able to:		
CO1	:	Apply object-oriented principles to design and implement real-world Java applications..
CO2	:	Design Java-based solutions to achieve modular and reusable code structures.
CO3	:	Analyze real-world problems and implement robust solutions using Java concepts.
CO4	:	Demonstrate Java's Collections Framework and Generics to create efficient, scalable, and type-safe data structures for software applications.

SEMESTER: I					
Course Code	:		DATA SCIENCE	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Elective Course with Integrated Lab) -A</i>	SEE Duration	: 3 Hours
UNIT – I					9 Hours
Introduction to Data Science: Data Science, Brief History of Data Science, Increasing attention to data science, Fundamental fields of study to data science, Data science and Related Terminologies, Types of Analytics, Application of Data Science, Data Science Process Model, Python environment and basics of Python: Jupyter notebook, setting working directory in python, variables, data types, operators, functions in python					
UNIT – II					9 Hours
Python for Data Science – Python libraries, Numpy Library, Pandas Library ; Introduction to Exploratory Data Analysis: Steps in data preprocessing, Understanding the data -Steps involved in EDA using Python Programming, looking at the data, visualizing the data, Treatment of Outliers, Data visualization using Python-Matplotlib Library, Seaborn Library, Dimensionality Reduction, Independent and Dependent Variable					
UNIT – III					9 Hours
Machine Learning and Supervised Learning Models: Types of Machine learning algorithms, Supervised and Unsupervised Learning Algorithms, Supervised Learning algorithm, Unsupervised learning algorithm, Overfitting and under fitting, correctness, The bias-variance tradeoff, Feature Extraction, and selection					
UNIT – IV					9 Hours
Supervised Learning Algorithms: K-Nearest Neighbors, Similarity Based on Distance Function, KNN Model Building , Model performance measures, Naïve Bayes algorithm Linear Regression, Building linear regression, Interpretation of Linear Regression coefficients, Validation of Linear regression ,Decision Tree, Tree Structure, Criteria for splitting decision node, Random Forest					
UNIT – V					9 Hours
Unsupervised Learning: Introduction, Association Rule Mining, Clustering, Distance Measures, Distance Matrix, Linkage Methods, Two forms of clustering, K Means clustering, Evaluation of Clusters, Text Analytics: Unstructured data, Word Cloud, Sentiment Analysis, Web and Social media Analytics					

LABORATORY	30 Hours
<ol style="list-style-type: none"> 1. Implement NumPy and pandas operations for Data Science concept(five each) 2. Consider the automobile dataset and perform exploratory data analysis. <ol style="list-style-type: none"> a. Identify the dimension, structure, and summary of the data set b. Preprocess the dataset and treat them (like missing values, 'na', ?). Justify the treatment c. Plot the histogram for continuous variables (at least two) to analyze the data. d. Draw a violin plot to describe the distribution of a numerical variable to analyze the data. e. Recognize the outliers using box plot (Display the box plot before and after outlier treatment) f. Display a heat map to display the relationship among the attributes g. Standardize the continuous variable (if any) 3. For the data set in Q2, <ol style="list-style-type: none"> a. Show the distribution of continuous variables using histogram b. Identify the relationship between two continuous variables using scatter plot c. Find and display the frequency of the categorical values using count plot d. Apply point plots to display one continuous and one categorical variable 4. Consider the health care dataset that consists of several imaging details from patients that had a biopsy to test for breast cancer. The variable diagnosis classifies the biopsied tissue as M = malignant or B = benign. Describe and pre-process the dataset. Use KNN supervised learning model to predict Diagnosis using texture mean and radius mean . Analyze the model using different k values and display the performance of the model 5. Consider the student performance dataset. Predict the student performance as “Pass” or “Fail” by implementing a decision tree. Perform data preprocessing and visualize the data. Identify the important features affecting the student performance and Analyze the efficiency of the decision tree using different metrics. Plot the decision tree. 6. For the dataset in Q5, apply random forest algorithm to predict the student performance. <ol style="list-style-type: none"> a. Plot the important variables using seaborn b. Tune the random forest for training and test data based on best parameters and implement it c. Analyze the model performance and display the output 7. For the placement dataset apply Naïve bayes classification <ol style="list-style-type: none"> a. Plot the prior probability and posterior probability b. Build the Naïve Bayes classifier c. Analyze the model performance 8. For the market basket dataset, apply apriori algorithm and identify the best rules based on Support and confidence values. 9. For the Mall-Customers dataset Implement k-means clustering algorithm and visualize the Clusters 10. Create different word cloud for the provided text file. 	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Apply fundamental concepts of data science in real world applications
CO2	:	Analyze the data science concepts for various scenarios
CO3	:	Demonstrate the different data science concepts for various domains like education, business, healthcare etc.
CO4	:	Evaluate and Analyze the performance of the models for real world applications

SEMESTER: I					
Course Code	:		COMPUTER NETWORKS	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Elective Course with Integrated Lab) -A</i>	SEE Duration	: 3 Hours
UNIT – I					9 Hours
The Unix/Unix Like Operating System architecture and commands: Unix Architecture, General purpose networking commands (ping, ifconfig, ARP, SSH) Introduction: Introduction, Network Hardware, Network Software: Protocol Hierarchies, Design Issues for the Layers Reference Models: The OSI Reference Model, The TCP/IP Reference Model, A Comparison of the OSI and TCP/IP Reference Models, Physical Layer-Guided Transmission Media					
UNIT – II					9 Hours
Data Link Layer: Data link Layer Design issues, Error Detection codes, Sliding Window Protocols (Stop and Wait, Go-Back-N (GBN) and Selective Repetitive (SR)) Medium Access Control: The Channel Allocation Problem, Multiple Access Protocols, Ethernet					
UNIT – III					9 Hours
The Network Layer: Network Layer Design issues, Routing algorithms- The Optimality Principal, Flooding, Distance Vector Routing, Link State Routing, Hierarchical routing, Congestion Control Algorithms. The Network Layer in the internet- IP version 4 Protocol, IP version 6 protocol: The Main IPv6 Header, Extension Headers, Internet Control Protocols: ICMP, ARP, DHCP					
UNIT – IV					9 Hours
The Transport Layer: The Transport Service: Services Provided to the Upper Layers, Transport service primitives, Berkeley Sockets, Elements of Transport Protocols, Internet transport protocols- TCP: TCP service model, TCP protocol, Segment Header, Connection establishment, connection release, TCP sliding window, UDP, RPC					
UNIT – V					9 Hours
The Application Layer: The Domain Name System, Name Servers, Electronic Mail: Architecture and Service, MIME, SMTP, POP, The World-Wide-Web, Streaming Audio and Video					

LABORATORY		30 Hours
<ol style="list-style-type: none">1. Create a LAN with three or more nodes implementing star topology and demonstrate basic networking commands with classful addressing.2. Create a Wireless LAN with two access points and demonstrate wireless distributed network3. Demonstration of Virtual LAN using GNS 34. Create a network with four routers and four hosts on different networks. Demonstrate RIP routing protocol using GNS 35. Create a network with four routers and four hosts on different networks. Demonstrate OSPF routing protocol using GNS 36. Build DHCP server using dns-masq with and without MAC binding with IPV4 and IPV67. Create a LAN using physical networks/virtual machine and install FTP server to demonstrate file transfer8. Demonstrate secured file transfer and computing over wired network and wireless network with SCP and SSH key based computing9. Build a Firewall to Restrict Network Access using IP tables10. Demonstrate Proxy - Server setup for a web server and SSH port forwarding		
Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	Apply the concept of layered approach in designing computer networks in real time
CO2	:	Analyse the design issues, services, interfaces and protocols for data flow in computer networks
CO3	:	Demonstrate the protocols and services designed for the layered approach
CO4	:	Evaluate the principles and protocols of computer networks for real time

SEMESTER: I					
Course Code	:		SKILL LAB	CIE Marks	: 50
Credits L-T-P	:	0-0-2		SEE Marks	: 50
Hours/Week	:	5	(Practice)	SEE Duration	: 3 Hours
Contents					
Week 1: Typing Skills - 50 words per minute Students are to practice typing with both the hands using any typing tutor and achieve a minimum speed of 50 words per minute					
Week 2 & 3: GNU Linux - Ubuntu Installation, File System, package installation, etc Students are introduced to GNU Linux environment, ubuntu installation, Linux File system, basic internal commands					
Week 4 & 5: Git Hub -Introduction, create, store, change, merge, and collaborate on files					
Week 6 & 7: Linux Shell Scriptings - using shell variables, special variables, operators, arrays, loop and loop controls, regular expressions, sed, awk, grep					
Week 8 & 9: Data Structures- Linked list, stack, queue, searching, sorting					
Week 10 & 11: COE based (IoT) introduction					
Week 12:					
Activities – to record video and present to the students To hear and write, read and write, do others understand your writing which matches your understanding Logic, flowchart and articulation					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Demonstrate enhanced typing speed and accuracy, achieving a minimum standard of 40 words per minute, using appropriate typing techniques. (Cognitive Level: Apply)			
CO2	:	Utilize Git commands to manage version control effectively, including branching, merging, and resolving conflicts, in day-to-day collaborative development tasks. (Cognitive Level: Apply)			
CO3	:	Collaborate on software development projects using GitHub, demonstrating proficiency in pull requests, issues tracking, and project boards. (Cognitive Level: Apply)			
CO4	:	Develop and execute Linux shell scripts to automate common system dministration tasks, such as file management, process monitoring, and backup operations. (Cognitive Level: Apply)			
CO5	:	Create modular and reusable Python scripts using libraries and packages for data manipulation and automation. (Cognitive Level: Create)			
CO6	:	Apply fundamental data structures such as arrays, linked lists, stacks, and queues to solve computational problems effectively. (Cognitive Level: Apply)

SEMESTER: I					
Course Code	:		BRIDGE COURSE MATHEMATICS	CIE Marks	: 50
Credits L-T-P	:	2-0-0	(Theory)	SEE Marks	: NO SEE
Hours	:	30L	(AUDIT COURSE)	SEE Duration	: -
UNIT - I					6 Hours
Set Theory: Basics of set theory, Cartesian product of sets, Relations, Properties of relations, Equivalence relations. Function composition and Inverse function (simple problems).					
UNIT - II					6 Hours
Sequence and Series: Sequences, Series, Arithmetic Progression (AP), Sum of Finite number of terms in AP, Arithmetic Means (AM), Geometric Progression (GP), sum to n terms of GP, Geometric Mean (GM), relation between AM and GM (simple problems).					
UNIT - III					6 Hours
Matrices and Determinants: Matrices, Types of matrices, Scalar multiplication, Addition of matrices, Product of Matrices Transpose of a matrix, Determinant of a matrix, Singular matrix and Inverse of a matrix (simple problems).					
UNIT - IV					6 Hours
Calculus: Limits- properties of limits, limits of Trigonometric Functions, Continuity (simple problems).					
Derivatives: Algebra of derivative of functions, polynomial, trigonometric function, product rule, quotient rule (simple problems).					
Integrals: Properties of integrals, Fundamental Theorem of Calculus (simple problems).					
UNIT - V					6 Hours
Statistics: Basic statistical concepts, qualitative and quantitative data, Classification of data, Construction of frequency distribution. Measure of central tendency—mean, median and mode. Measures of dispersion—standard deviation (simple problems)					
Course Outcomes:					
After going through this course the student will be able to:					
CO1	:	Explore the fundamental concepts of Set theory, Sequence and Series, Matrices and Determinants, Calculus and Statistics (PO1, PO4, PO6)			
CO2	:	Apply theoretical concept of Set theory, Sequence and Series, Matrices and Determinants, Calculus and Statistics to Formulate the problems in engineering problem, (PO1, PO2, PO4, PO6)			
CO3	:	Analyze the solution of the modern engineering problems solved using appropriate techniques of Set theory, Sequence and Series, Matrices and Determinants, Calculus and Statistics to optimize the solutions of engineering problem. (PO1, PO3, PO4, PO6)			
CO4	:	Develop the overall mathematical knowledge gained to demonstrate and analyze the Problems arising in real world situations. (PO1,PO2, PO3, PO4, PO6)

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

CIE will consist of TWO Quizzes (Q) and TWO Tests (T) component **[20 (Q) + 30 (T) = 50 marks]**

Sl.No.	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO TESTS will be conducted. Each test will be evaluated for 30 Marks, adding up to 60 Marks. FINAL TEST MARKS WILL BE REDUCED TO 30 MARKS.	30
	MAXIMUM MARKS FOR THE CIE	50

SEMESTER: II					
Course Code	:		MODERN APPLICATION DEVELOPMENT	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Core Course with Integrated Lab) -1</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
History, Operating System, Setup, Project Basics, Create an AVD, The IDE, Main Editor, Project Tool Window, Intents, Activity, Layout File, View and ViewGroup Objects, What Intents are for, Implicit Intents, The UI Thread, Threads and Runnables, Storing Simple Data					
UNIT - II					9 Hours
Introduction to PWAs and Tooling: Intro. to Progressive Web Apps, Tools to Measure Progressive, WebApps. PWA Features - Service Workers: Promises, Fetch, Service Worker, Register the Service Worker, Updating, Service, Worker. Caching and Offline Functionality with Service Workers: The Fetch API, Cache API, going Offline, Different Caching Strategies.					
UNIT - III					9 Hours
Features to Use: Adding your App to the Home Screen with Web App Manifest, Turning a Real App into a PWA Notifications: Web Notifications: Requesting Permission to Notify, sending a Notification, Tagging Notifications, Web Notifications with Service Workers.					
UNIT - IV					9 Hours
Introducing Flutter - Defining Widgets and Elements Installing the Flutter SDK - Installing on Linux, System Requirements, Get the Flutter SDK, Check for Dependencies Understanding Widget Lifecycle Events - The StatelessWidget Lifecycle, The StatefulWidget Lifecycle Learning Dart Basics - Why Use Dart? Commenting Code, Running the main() Entry Point, Referencing Variables, Declaring Variables, Using Flow Statements, Using Functions, Import Packages, Using Classes, Implementing Asynchronous Programming					
UNIT - V					9 Hours
Using Basic Widgets - Text, Container, Column, Row, Button Laying Out Your Widgets - Laying out the whole scene, MaterialApp widget The Scaffold widget, The AppBar widget Custom gestures for your custom widgets - Decide on your gestures and behaviors, Create your custom widget, Add a GestureDetector widget, Associate your gesture with its behavior					

LABORATORY		30 Hours
<ol style="list-style-type: none"> 1. Develop an app to display a Progress Bar and show a message with Alert Dialog 2. Create an app to navigate from one activity to another using an intent object and passing data 3. Build a simple web page using PWA by adding a Service Worker 4. Create a login page to authenticate a user using PWA with Manifest file 5. Demonstrate online and offline web page load using PWA, Service Worker and Caching 6. Build an application to do a stock display using PWA using a raw JSON file 7. Code a Click Counter App in Flutter using a basic UI layout with state management 8. Create a Message Toggle Application using the basics widgets in Flutter 9. Demonstrate the use the GestureDetector widget to respond to double-tap and swipe events using Flutter 10. Build a simple counter app with increment and decrement buttons to show subsequent values on screen 		
Course Outcomes: After going through this course the student will be able to:		
CO1	:	Apply core Android development concepts by creating activities, intents, and layouts, and managing threads for efficient data handling and UI updates.
CO2	:	Analyze the components of Progressive Web Applications (PWAs) to evaluate caching strategies and offline functionality using service workers and the Fetch API.
CO3	:	Design user-engaging web apps by implementing push notifications, web manifests, and custom notification behaviors with service workers.
CO4	:	Develop cross-platform mobile applications using Flutter by constructing interactive UIs with widgets, applying Dart programming principles, and managing stateful and stateless widget lifecycles.

Course Code	:		DESIGN AND ANALYSIS OF ALGORITHM	CIE Marks	: 100
Credits L-T-P	:	3-1-0	(Theory)	SEE Marks	: 100
Hours	:	45L+45EL+30T	(Professional Core Course)	SEE Duration	: 3 Hours
UNIT - I					9 Hours
The Role of Algorithms in Computing: Algorithms, Algorithms as a technology, Insertion sort, analyzing algorithms, designing algorithms, Characterizing Running Times, Big O-notation, omega-notation, and theta-notation, Asymptotic notation: formal definition, Standard notations and common functions. Mathematical Analysis of substitution method to solve Non-Recursive and Recursive Algorithms					
UNIT - II					9 Hours
Divide and Conquer: Binary Search, Merge Sort, Quick Sort and its performance. Decrease-and-Conquer & Greedy Method Decrease and Conquer: Analysis of running time complexity- Topological Sorting, Depth First Search using stack, Breadth First Search using Queue					
UNIT - III					9 Hours
Greedy Method: Representation of Graphs, Knapsack Problem, Minimum-Cost Spanning Trees: Prim's Algorithm, Kruskal's Algorithm; Single Source Shortest Paths. Sorting and Order Statistics: Sorting in Linear Time, Medians and Order Statistics, Heapsort. Space and Time Trade Offs and Limitations of Algorithmic Power Space-Time Tradeoffs: Introduction, sorting by Counting, Input Enhancement in String Matching. Limitation of Algorithmic Power: Lower-Bound Arguments, Decision Trees					
UNIT - IV					9 Hours
Advanced Design and Analysis Techniques: Dynamic Programming- Elements of dynamic programming, longest common subsequence, Optimal binary search trees. Warshall's Algorithm, Floyd's Algorithm for the All-Pairs Shortest Paths Problem					
UNIT - V					9 Hours
Amortized Analysis: Aggregate analysis, The accounting method, The potential method, Dynamic tables. Backtracking: n – Queens problem, Hamiltonian Circuit Problem, Subset – Sum Problem Branch and Bound-Assignment Problem, Travelling Salesman Problem					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Apply the asymptotic performance of algorithms			
CO2	:	Strategize algorithms using different design techniques for a given computing problem			
CO3	:	Analyze the techniques to find optimal solutions, improving computational efficiency			
CO4	:	Synthesize efficient algorithms for real world problem

TESTS: Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO TESTS will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS. Students should score minimum 40% in TEST to clear CIE	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS.	40
	MAXIMUM MARKS FOR THE CIE	100

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)

Q.NO.	CONTENTS	MARKS
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	100

SEMESTER: I					
Course Code	:		AGILE SOFTWARE DEVELOPMENT	CIE Marks	: 100
Credits L-T-P	:	3-0-0	(Theory)	SEE Marks	: 100
Hours	:	30L+45EL	(Professional Core Course)	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Agile Software Development: Agile methodology frameworks for software Development Scrum Framework: What is Agile software Development? What is Scrum? Why should you choose Scrum? Foundation of Scrum, Pillars of Empiricism, Scrum Values, identifying a Scrum Team; Introducing the Scrum Master; Working with the Product Owner; Scrum Events: Spring planning, Implementation and review					
UNIT - II					9 Hours
Scrum Events- Getting ready to Sprint; Deciding on the Sprint duration; Setting the Sprint Goal Defining Done as working and potentially shippable software; Starting the Sprint with Sprint Planning- for the Scrum Master, Product Owner and Developers. Keeping on the right track with the Daily Scrum, Inspecting the product during a Sprint Review, Inspecting the team with the Sprint Retrospective					
UNIT - III					9 Hours
Scrum artifacts- Understanding the value of the Scrum Artifacts, Creating, Managing and refining product backlog; Making a commitment- the Product Goal- Creating backlog items as user stories, Creating Product backlog items as features, Refining the Product Backlog, Creating and Managing the Sprint Backlog; Producing a Product Increment					
UNIT - IV					9 Hours
Scrum in Action - Planning and Estimating with Scrum: Choosing an Estimation Scale, Creating a Baseline. Playing Planning poker, Estimating backlog items using a Bucket method, Envisioning the product journey with a product roadmap; Sprint Journey: Refining the Product Backlog, learning how to apply order to the product backlog. Scrum master duties for Product Backlog Refinement. Tracking progress with a Scrum Board, Defects in Sprint;					
UNIT - V					9 Hours
Facets of Scrum: Software development practices for Scrum- Source control model for continuous integration, Continuous delivery and continuous deployment, leveraging testing methods for Scrum, Applying Scrum to remote teams					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Apply Agile practices in managing real-world projects.			
CO2	:	Analyze project scenarios to select the most appropriate Agile framework for optimal delivery of business value			
CO3	:	Assess performance using Agile metrics to ensure project alignment with objectives.			
CO4	:	Design a comprehensive Agile workflow tailored to a specific project, integrating user stories, iterative plans, and prioritization strategies.

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 marks]**

Sl.No.	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO TESTS will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS. Students should score minimum 40% in TEST to clear CIE	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS.	40
	MAXIMUM MARKS FOR THE CIE	100

RUBRIC FOR SEMESTER END EXAMINATION (SEE-Theory)

Q.NO.	CONTENTS	MARKS
1 & 2	Unit 1: Question 1 or 2	20
3 & 4	Unit 2: Question 3 or 4	20
5 & 6	Unit 3: Question 5 or 6	20
7 & 8	Unit 4: Question 7 or 8	20
9 & 10	Unit 5: Question 9 or 10	20
	MAXIMUM MARKS FOR THE SEE	100

SEMESTER: II					
Course Code	:		DATA ANALYTICS	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Elective Course with Integrated Lab) -B</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Introduction to Data Analytics: Hadoop Eco System Hadoop Fundamentals Data, Data Analysis and storage, Comparison with other systems – Relational Database Management Systems The Hadoop Distributed File system: The Design of HDFS, HDFS Concepts – Blocks, Name nodes and Data nodes, Block Caching, HDFS, Federation, HDFS High Availability, The Command-Line Interface, Hadoop File system – Interfaces Data Flow: Anatomy of a File Read, Anatomy of a File Write					
UNIT - II					9 Hours
Map Reduce: Distributed Processing Framework- A Weather Dataset – Data format, Analyzing the data with Unix Tools, Analyzing the Data with Hadoop – Java MapReduce, Scaling Out Working of Map Reduce: Anatomy of a Map Reduce Job Run, Failures, Shuffle and Sort, Task Execution Map Reduce Formats - Input Formats, Output Formats					
UNIT - III					9 Hours
Pig Introduction: Scripting - Execution types, Running Pig programs, Grunt, Pig Latin Editors, Comparison with databases Pig Latin: Structure, Statements, Expressions, Types, Schemas, Functions, Macros, Data Processing Operators – Parameter Substitution - Preprocessing, Loading and storing of data, Filtering Data, Grouping and Joining Data, Sorting Data, Combining and splitting Data Pig in Practice: Parallelism, Anonymous Relations Push Notifications: Subscribing a User to Push Notifications, Saving the PushSubscription Object, Triggering the Push Notification, Catching Push Events in the Service Worker					
UNIT - IV					9 Hours
Hive Introduction: The Hive shell, Hive services, the Meta store, Comparison with Traditional Databases – Schema on Read Versus Schema on Write, Updates, Transactions and Indexes Hive QL: Data Types, operators and functions Tables: Managed Tables and External Tables, Partitions and Buckets, Storage Formats, Importing Data, Altering Tables, Dropping Tables Querying Data: Sorting and Aggregating, Joins, Sub queries, Views					
UNIT - V					9 Hours
Spark Applications: Jobs, Stages, and Tasks, A Scala Standalone Application, Resilient Distributed Datasets - Creation, Transformations and Actions, Persistence, Serialization Shared Variables: Broadcast Variables, Accumulators, Anatomy of a Spark Job Run - Job Submission, DAG Construction					

LABORATORY	30 Hours
<ol style="list-style-type: none"> 1. Introduction to Hadoop Ecosystems .Review the commands available for the Hadoop Distributed File System: <ol style="list-style-type: none"> a. Copy file foo.txt from local disk to the user's directory in HDFS b. Get a directory listing of the user's home directory in HDFS c. Get a directory listing of the HDFS root directory d. Display the contents of the HDFS file user/fred/bar.txt e. Move that file to the local disk, named as baz.txt f. Create a directory called input under the user's home directory g. Delete the directory input old and all its contents h. Verify the copy by listing the directory contents in HDFS 2. Map Reduce Program on Counting <ol style="list-style-type: none"> a. Write a Java Program using Mapper and Reducer function to find the number of records in the give dataset b. Submit the job to cluster c. Track the job information 3. Map Reduce Program using Temperature Dataset <ol style="list-style-type: none"> a. Write a Java program for finding Maximum recorded temperature by the year from Weather Dataset b. Submit the job to cluster c. Find the status of the Job and terminate it 4. Programs on Pig Script Using movie lens data <ol style="list-style-type: none"> a. List all the movies and the number of ratings b. List all the users who have rated the same movie and find the number of ratings c. List all the Users who have rated the movies (Users who have rated at least one movie) d. Find the count of the Movie which has the ratings more than 3 e. Find the max, min, average ratings for all the movie 5. Program on Advanced Concepts in Pig <ol style="list-style-type: none"> a. Group by Year and dump the result in a bag b. Write a pig script to find the maximum temperature c. Write a pig Script to find the average temperature of a state for 3 years and store the result in HDFS 6. Demonstrate Anonymous Relation and Parameter Substitution to find Maximum Temperature in a given Dataset using Pig script 7. Demonstrate the Managing tables in Hive by considering appropriate schema for Movielens data set 8. Extract facts using Hive on movie lens data <ol style="list-style-type: none"> a. Write a query to select only those records which correspond to starting, browsing, Completing, or purchasing movies. Use a CASE statement to transform the RECOMMENDED column into integers where 'Y' is 1 and 'N' is 0. Also, ensure GENREID is not null. Only include the first 25 rows. b. Write a query to select the customer ID, movie ID, recommended state and most recent Rating for each movie 9. Demonstrate the Spark query for displaying the data frame. 	

Course Outcomes:

After going through this course the student will be able to:

CO1	:	Apply the different building blocks of Big Data Technologies to a given problem
CO2	:	Design and Analyze the programming aspect of Big Data Technologies to obtain solution to the problem through lifelong learning
CO3	:	Demonstrate solutions for societal and environmental concern problems using modern engineering tools through writing effective queries
CO4	:	Assess the use of Big Data Technologies as an Individual /as a team member for the real world data analytics

SEMESTER: II					
Course Code	:		BUSINESS INTELLIGENCE & VISUALIZATION	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Elective Course with Integrated Lab) -B</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Introduction to Business Intelligence and Data Visualization Business Intelligence and its Architecture: BI by other names, How BI provides business value, BI Market, Battle Scars, The Research, Best Practices for successful Intelligence Components of BI Architecture: Operational and Source Systems, Data Transfer – from Operational to Data Warehouse, Data Warehouse, DW tables, Technology platform Defining Data Visualization: The Components of Understanding - The Importance of Conviction - Visualization work flow – The importance of process – Process in practice - Different tools for Data Visualization					
UNIT - II					9 Hours
Data Types and Power BI Working with data: Data Literacy – Data Assets and Tabulation types – Data types – Statistical Literacy - Data Acquisition – Data Examination Overview of Power BI: Understanding Power BI – Features – Connect to Different Data Sources Using Power BI and Data Modeling					
UNIT - III					9 Hours
Usage of Data for visualization Data Representation: Introducing visual encoding – Chart Types - Influencing Factors and Considerations - Visualization using Graphs, Plots, Charts and Geospatial Maps using Power BI					
UNIT - IV					9 Hours
Data Handling and Interaction Interactivity - Features of Interactivity: Data Adjustments and Presentation Adjustments - Influencing Factors and Considerations Handling data: Data Analysis and Expressions (DAX) – Calculated Columns – Representation using Data Columns					
UNIT - V					9 Hours
Visualization and Query handling: Visualization Literacy - Viewing: Learning to See - Creating: The Capabilities of the Visualizer Creating Reports and Publishing Reports – Design Dashboards and Publishing using Gateways, Basic power BI queries					

LABORATORY		30 Hours
<p>1. Analysis of revenue in sales dataset and build dashboard with following criteria:</p> <ol style="list-style-type: none"> Create a choropleth map (fill the map) to spot the special trends to show the state which has the highest revenue. Create a line chart to show the revenue based on the month of the year. Create a bin of size 10 for the age measure to create a new dimension to show the revenue. Create a donut chart view to show the percentage of revenue per region by creating zero access in the calculated field. Create a butterfly chart by reversing the bar chart to compare female & male revenue based on product category. Create a calculated field to show the average revenue per state & display profitable and non-profitable state. <p>2. Analysis of Amazon Prime Dataset and create the dash board with following criteria:</p> <ol style="list-style-type: none"> Create a Donut chart to show the percentage of movie and tv shows Create a area chart to shows by release year and type. Create a horizontal bar chart to show Top 10 genre Create a map to display total shows by country Create a text sheet to show the description of any movie/movies. <p>3. Develop a dashboard to analyze waste generation and recycling patterns in urban areas of India. The dashboard will focus on key metrics such as waste types, recycling rates, disposal methods, and community engagement in sustainability practices</p> <p>4. Develop a dashboard to monitor wildlife populations and their habitats in India, focusing on key metrics such as population trends, habitat conditions, and human impact factors (like deforestation, pollution, or poaching).</p> <p>5. Develop a dashboard and service to monitor and optimize urban mobility by analyzing traffic patterns, public transportation usage, and air quality in Indian cities.</p>		
Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	Apply the principles of Business Intelligence and Data Visualization techniques on the different data types.
CO2	:	Demonstrate the relevant visual encoding techniques like chart, graph, plot etc for real time examples using visualization tools
CO3	:	Perform data analysis, graphical representation, and interpretation to various phenomena in real life applications
CO4	:	Design, customize and publish interactive reports / dashboards using various visualization techniques

SEMESTER: II					
Course Code	:		INTERNET OF THINGS	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Elective Course with Integrated Lab) -B</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Introduction to Internet of Things: Fundamentals of Electronics and devices for Internet of Things: Rectification process, Diode characteristics, Digital electronics, Transistor behaviour and Oscillators Physical and Logical design of IoT Technologies that enable Internet of Things Applications and Use cases, IoT Deployment Levels. Network and Communication, Standards related to Internet of Things, Protocols in Internet of things					
UNIT - II					9 Hours
Programming with Arduino UNO and ESP32 : Understanding the Eco system of Arduino, Pin-out configuration, Digital input and output, Analog input and output, working with sensors and actuators. Arduino serial communication. Communication interfaces (SPI and I2C) wired and wireless communication with Arduino using Bluetooth modules					
UNIT - III					9 Hours
Programming with Raspberry Pi and Pico W: Understanding the eco system of Raspberry Pi4 and Pico W, Pinout configuration, python modules like RPi.GPIO and gpiozero. Digital input and output, working with sensors and actuators. Raspberry Pi or Pico serial communication. Communication interfaces (SPI and I2C).wired and wireless communication with raspberry Pi or Pico W. Serial communication from raspberry Pi4 to Arduino and vice versa. Monitoring and Controlling between raspberry pi.					
UNIT - IV					9 Hours
Working with IoT Platform and Dashboard: Configuring any hosted service like blynk or Adafruit or Things board with development boards, sensors and actuators. Development of Local IoT Dashboards: Integrating node-red with sensors and actuators, customizing node red using java script and integrating alerting services with node red. Setup and configure MQTT publisher , broker and subscriber using Raspberry pi 4 and exp32 generate visualization and analytics based on the data logged about the sensors, Working with things board and setting up IoT dashboards locally and configure sensor, actuators and development boards with things board					
UNIT - V					9 Hours
Case study : Industrial IoT Applications, Study on Industrial IoT application related to controlled environment agriculture, energy monitoring and harvesting, production system, vision based applications, water quality monitoring, health monitoring of plants, machines or humans and location based applications					

LABORATORY		30 Hours
<p>Practice Lab : Fundamentals of Electronics using SEELab3 kit and Introduction to variety of devices and development boards used to develop IoT Applications Full wave rectifier using PN junction : Refer Section 3.3 in the SEELab3 kit manual Diode V-I functional analysis Refer Section 3.13 in the SEELab3 kit manual Logic gates : Refer Section 3.11 in the SEELab3 kit manual PNP & NPN transistor nature : Refer Section 3.13 and 3.15 in the SEELab3 kit manual IC555 oscillator :Refer Section 3.6 in the SEELab3 kit manual Identifying the IoT Kit elements : sensors , actuators and development boards and other accessories, Study about the principle of operations, operating conditions, cost, tolerance and durability of different devices in the kit</p>		
<ol style="list-style-type: none"> Develop the weather station using Arduino UNO and ESp32 integrating different sensors Note: Students should develop their own models and integrate sensors to mimic the weather station. Custom wind speed and direction calculation , Visualization about the same with history of data to be provided Demonstrate MQTT publisher, MQTT BROKER and MQTT Subscriber using Raspberrypi4 ESP32 or Pico W and Esp32. Save the sensor data published in a SD card and also integrate visualization and basic analytics. Note : The data to be published could be related to water quality parameters or data could be related to plant , machine or person health parameters Develop a custom IoT dashboard or things board using node-red and integrate alerting services based on the sensor values Note : node red installation , customization of widget and integrating the alerting services has to be demonstrated by integrating to those application other than scenarios given in program1 and program2 		
<p>Course Outcomes: After going through this course the student will be able to:</p>		
CO1	:	Apply fundamental programming skills to explore various libraries developed for different development boards like Arduino Uno, esp32, raspberry pi 4 or Raspberry Pico W to repeat monitor different sensor values, log the monitored data and control actuators.
CO2	:	Design automation scripts using different programming and scripting languages like bash script/python script/JavaScript to monitor and control the sensor and actuators to integration with development boards
CO3	:	Develop custom IoT dashboards and integrate sensors, actuators and alerting services using tools like node red and Things board
CO4	:	Analyze various IIoT integration protocols, standards and tools available as hosted service for IoT data visualization and analysis using hosted cloud based IoT platform and dashboard services

Course Code	:		CLOUD COMPUTING	CIE Marks	: 100 + 50
Credits L-T-P	:	3-0-1	<i>(Theory & Practice)</i>	SEE Marks	: 100 + 50
Hours	:	45L+45EL+30P	<i>(Professional Elective Course with Integrated Lab) -B</i>	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Introduction & Concepts: Introduction to Cloud Computing: Characteristics of Cloud Computing, Cloud Models, Cloud Service Examples, Cloud-based Services & Applications. Migrate into a Cloud: Introduction, Broad Approaches to Migrating into the Cloud, The Seven-Step Model of Migration into a Cloud					
UNIT - II					9 Hours
Cloud Concepts & Technologies: Virtualization, Load Balancing, Scalability & Elasticity, Deployment, Replication, Monitoring, Software Defined Networking, Network Function Virtualization, Identity and Access Management, Service Level Agreements, Billing.					
UNIT - III					9 Hours
Cloud Application Design: Introduction, Design Considerations for Cloud Applications, Reference Architectures for Cloud Applications, Cloud Application Design Methodologies, Data Storage Approaches.					
UNIT - IV					9 Hours
Introducing Docker: Docker components, Containers, Getting Started with Docker, working with our first container, Container naming, Starting a stopped container, Attaching to a container, Creating daemonized containers, Seeing what's happening inside our container, Inspecting the container's processes, Stopping a daemonized container, Finding out more about our container, Deleting a container					
UNIT - V					9 Hours
Cloud Security: Introduction, CSA (Cloud Security Architecture) Authentication, Authorization, Identity & Access Management, Data Security, Key Management, Auditing. Virtual Machine Security, Security of Virtualization, Security risk posted by a management OS					

LABORATORY		30 Hours
<ol style="list-style-type: none"> 1. Launch a Linux or Window Server by creating VPC, Route Table in a cloud 2. Create Storage space using Storage Services in cloud 3. Demonstrate the working of Load Balancer and Elastic IPs in cloud. 4. Demonstrate Identity and access management (IAM) in cloud 5. Create RDS Server and connect using MySQL Workbench 6. Deploy PHP Code on EC2 instance that retrieve data from RDS Server 7. Build static website and host application from desktop on cloud 8. Demonstrate ECLIPSE Integration with cloud 9. Deploy Java application by connecting to RDS Server in cloud 10. Demonstrate auto scaling group concept in cloud 11. Deploy and test docker container websites using cloud 		
Course Outcomes:		
After going through this course the student will be able to:		
CO1	:	Apply cloud concepts and technologies to solve practical computing problems
CO2	:	Analyze cloud application design methodologies and approaches for building efficient cloud-based systems.
CO3	:	Evaluate the effectiveness of cloud solutions, understanding its components and processes.
CO4	:	Design secure cloud services for cloud applications

RUBRIC FOR THE CONTINUOUS INTERNAL EVALUATION (CIE-Theory)

CIE will consist of TWO Quizzes (Q), TWO Tests (T), and ONE Experiential Learning (EL) component **[20 (Q) + 40 (T) + 40 (EL) = 100 Marks]**

Sl.No.	COMPONENTS	MARKS
1.	QUIZZES: Quizzes will be conducted in online/offline mode. TWO QUIZZES will be conducted & each Quiz will be evaluated for 10 marks, and Final Quiz marks adding up to 20 marks. THE SUM OF TWO QUIZZES WILL BE CONSIDERED AS FINAL QUIZ MARKS.	20
2.	TESTS: Students will be evaluated in test consisting of descriptive questions with different complexity levels (Revised Bloom's Taxonomy Levels: Remembering, Understanding, Applying, Analyzing, Evaluating, and Creating). TWO TESTS will be conducted. Each test will be evaluated for 50 Marks, adding up to 100 Marks. FINAL TEST MARKS WILL BE REDUCED TO 40 MARKS. Students should score minimum 40% in TEST to clear CIE	40
3.	EXPERIENTIAL LEARNING: Students will be evaluated for their creativity and practical implementation of the problem. Phase I (20) & Phase II (20) ADDING UPTO 40 MARKS.	40
CIE THEORY TOTAL		100

SEMESTER: II					
Course Code	:		CYBER SECURITY AND BLOCKCHAIN	CIE Marks	: 100
Credits L-T-P	:	3-1-0	(Theory)	SEE Marks	: 100
Hours	:	45L+45EL+30T	(Professional Elective Course) -C	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Introduction: Defining Cyberspace and Cyber security, Standard of Good Practice for Information Security, NIST Cyber security Framework. System Access: System Access Concepts, User Authentication, Password-Based Authentication, Possession-Based Authentication, Biometric Authentication, Risk Assessment for User Authentication, Access Control, Customer Access					
UNIT - II					9 Hours
Phishing: Introduction, Phishing – Methods of Phishing, Phishing Techniques, Spear Phishing, Types of Phishing scams, Phishing Toolkits and Spy Phishing, Phishing Countermeasures. Identity Theft- Personally Identifiable Information (PII), Types of Identity Theft, Techniques of ID theft, Countermeasures, how to efface your online identity					
UNIT - III					9 Hours
Tools and Methods used in Cybercrime: Introduction, Proxy Server and Anonymizers, Steganography, DOS and DDOS attack, SQL injection, Buffer Overflow, Attacks on wireless and mobile networks, mobile devices					
UNIT - IV					9 Hours
Introduction to Vulnerability Assessment and Penetration Testing: Why you need to understand your enemy's tactics, recognizing the gray areas in security, Vulnerability Assessment and Penetration Testing. Penetration Testing and Tools: Social Engineering Attacks: How a social engineering attack works, conducting a social engineering attack, common attacks used in penetration testing, preparing yourself for face-to-face attacks, defending against social engineering attacks.					
UNIT - V					9 Hours
Blockchain: History, types of blockchain, Consensus, Decentralization using blockchain, methods of decentralization, roots of decentralization, blockchain and full ecosystem decentralization, Smart contracts, decentralized organizations, Plot forms for decentralization					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Apply the basic concepts of Cyber security and Blockchain Technology to protect assets			
CO2	:	Analyze vulnerabilities and identify solutions to address threats in cyber systems			
CO3	:	Demonstrate the effectiveness of Cyber security methods and Blockchain Technology for real time needs			
CO4	:	Design and develop secure solutions for real world problems

SEMESTER: II					
Course Code	:		GenAI	CIE Marks	: 100
Credits L-T-P	:	3-1-0	(Theory)	SEE Marks	: 100
Hours	:	45L+45EL+30T	(Professional Elective Course) -C	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Basics of Generative AI: Basics of Generative AI: Introduction to AI, Types of Generative Models (Autoregressive, Variational, Adversarial) Applications of Generative AI (Art and Creativity, Image and Video Generation, Text Generation, Music Composition), Generative AI vs Discriminator AI, Popular Generative Models - GPT, DALL·E, StyleGAN, NLP foundation.					
UNIT - II					9 Hours
Overview of Large Language Models: LLMs and their architectures. Benefits, Challenges and Limitations. Best LLM and frameworks - GPT-4, Gemini, Lang Chain; Evolution of generation-GANs, GAN architecture - Generator and Discriminator networks, Types of GANs - DCGAN, WGAN, StyleGAN, CycleGAN and attention mechanisms, Variable Auto Encoders					
UNIT - III					9 Hours
Introduction to Prompt Engineering: Principles for designing effective prompts (such as Persona Pattern, Root Prompts). Techniques for controlling the style, tone, and content of generated text, strategies for incorporating external knowledge into prompts, Approaches to handle complex or multi-part prompts					
UNIT - IV					9 Hours
Advanced Techniques: Understanding BERT architecture and pre-training objectives. Fine-tuning BERT for downstream NLP tasks. Exploration of advanced Transformer architectures and techniques. Applications and Future Directions: Real-world applications of large language models. Challenges and limitations of current approaches. Emerging trends and future directions in Generative AI.					
UNIT - V					9 Hours
Security aspects in Gen AI: Misuse of Generated content, Adversarial Attacks, IP Theft, Bias Detection and Mitigation, Data privacy and Security, Fairness, Transparency, and accountability, Regularity and legal considerations in LLMs, Ethical Principles in AI.					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Apply prompt engineering principles to design effective prompts for diverse generative AI applications			
CO2	:	Demonstrate large language models architecture and working for various in real-world scenarios			
CO3	:	Build LLM Models and Frameworks to generate text, audio, image, and video content			
CO4	:	Analyze the ethical, security, and legal challenges associated with generative AI tools and models

Course Code	:		EXTENDED REALITY	CIE Marks	: 100
Credits L-T-P	:	3-1-0	(Theory)	SEE Marks	: 100
Hours	:	45L+45EL+30T	(Professional Elective Course) -C	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Introduction to Virtual and Augmented Reality: What is VR/AR about? – The perfect Virtual Reality, The Simulation of the World, Suspension of Disbelief, Motivation. Virtual Reality-Technology-centered characterizations of VR, VR as an Innovative Kind of Human-Computer Interaction, Mental Aspects of the VR Experience. VR Systems, Augmented Reality-Introduction, Registration, Visual Output- Handheld Devices, AR Systems					
UNIT - II					9 Hours
Virtual Worlds: Requirements on 3D Object Representations for Virtual Worlds, Creation of 3D Models, Preparation of 3D Models for VR/AR, Integration of 3D Models into VR/AR Runtime Environments. Surface models- Polygonal Representations, Polygons, Polygon Meshes, Triangle Strips. Solid Models- Boundary Representation (B-Reps), Primitive Instancing, Appearance Materials, Textures and Shaders					
UNIT - III					9 Hours
Unity 3D Game engine: Working in Unity- Getting Around in Unity, Working with Game Objects, Working with Components, Working with Prefabs, Working with Scenes, Managing Assets, Building Unity Projects, Accessing Preferences, Installing Unity Packages, Physics materials, Mesh colliders, Box collider, Materials, Textures					
UNIT - IV					9 Hours
Animation and Object Behavior: Keyframe Animation, Physics based Animation of Rigid Bodies, Object Behavior, Behavior and Animation in Scene Graphs. Light sources, Sound, Background, Special purpose systems- Virtual Humans, Particle Systems, Terrain, Vegetation					
UNIT - V					9 Hours
VR/AR Input Devices and Tracking: Fundamentals of Input Devices, Basics of Visual Output, Camera based Tracking- Marker-based Methods, Tracking Using black and white markers, Marker Free tracking					
Course Outcomes:					
After going through this course the student will be able to:					
CO1	:	Apply Game objects and their representations for building XR world			
CO2	:	Design the XR story board for the application requirements			
CO3	:	Build and Analyze XR model components			
CO4	:	Demonstrate knowledge of working with Game Engine

SEMESTER: II					
Course Code	:		SOFTWARE TESTING	CIE Marks	: 100
Credits L-T-P	:	3-1-0	(Theory)	SEE Marks	: 100
Hours	:	45L+45EL+30T	(Professional Elective Course) -C	SEE Duration	: 3 Hours
UNIT - I					9 Hours
Basics of Software Testing: Basic Definitions, Evolution of Software Testing, Goals of Software Testing, Levels of Testing, Model for Software Testing, Software testing life cycle, Software testing methodologies: Waterfall testing, Agile Testing. Software failure case studies					
UNIT - II					9 Hours
Testing techniques					
Black-Box Testing Techniques: Boundary Value Analysis, Equivalence Class Testing, State Table-Based Testing, Decision Table-Based Testing, Cause-Effect Graphing Based Testing, Error Guessing,					
White-Box Testing Techniques :Need, Basis Path Testing, Graph Matrices, Loop Testing, Data Flow Testing, Mutation Testing, Static Testing, Progressive vs. Regressive Testing, Regression Testing Techniques.					
UNIT - III					9 Hours
Model-Driven Test Design(MDTD): Software testing foundations, Testing activities, Coverage Criteria, Test Design, Test Automation, Test Execution, Test Evaluation, Software Testing Guidelines, Importance of MDTD					
Test Automation: Need for Automation, Categorization of Testing Tools, Selection of Testing Tools, Guidelines for Automated Testing, Test Automation Framework: JUnit, Data-Driven Tests					
UNIT - IV					9 Hours
Managing the Testing Process: Test Organization, Structure of Testing Group, Test Planning, Detailed Test Design and Test Specifications, Testing Metrics for Monitoring and Controlling the Testing Process, Test Suite Prioritization, Types of Test Case Prioritization					
Test Implementation: Integration order, Test Doubles: Stubs and Mocks, Object oriented Testing, Debugging Process and Techniques.					
UNIT - V					9 Hours
Cross-Platform Software Testing Vs Multiplatform Software Testing:					
Cross-Platform Software Testing: Understanding Cross-Platform Testing, Need, Challenges, Step-By-Step to Cross-Platform Testing, Cross-Platform Testing vs Cross-Device Testing, Overview of some best Cross-Platform Testing Tools in the Market(Appium, Eggplant)					
Multiplatform Software Testing : Objectives, Concerns, Background on Testing in a Multiplatform Environment, Workbench, Input, Do Procedures and Tasks, Check Procedures, Output, Guidelines, Cross-Platform Software Testing Vs. Multiplatform Software Testing					

Course Outcomes:

After going through this course the student will be able to:

CO1	: Apply various software testing techniques to ensure software quality in real-world scenarios.
CO2	: Analyze test automation frameworks and tools to select the most suitable approach for diverse testing needs.
CO3	: Demonstrate effective test case prioritization and debugging techniques to optimize the testing process.
CO4	: Synthesize cross-platform and multi-platform testing strategies to address the challenges of diverse software environments

SEMESTER: II					
Course Code	:		RESEARCH METHODOLOGY	CIE Marks	: NA
Credits L-T-P	:	2-0-0	<i>(Theory - NPTEL Online Course)</i>	SEE Marks	: 100
Hours	:	60L		SEE Duration	: 3 Hours
This course is indicative only and it is subject to change based on the courses running at that time by NPTEL					
Duration of the ONLINE Course - 8 Weeks					
Week 1: A group discussion on what is research; Overview of research Week 2: Literature survey, Experimental skills Week 3: Data analysis, Modelling skills Week 4: Technical writing; Technical Presentations; Creativity in Research Week 5: Creativity in Research; Group discussion on Ethics in Research Week 6: Design of Experiments Week 7: Intellectual Property Week 8: Department specific research discussions					
Course duration: 8 Weeks Course start Date: Jan 20,2025 Course end date: March 14,2025 Probable Exam date: March 22,2025 Course Instructors: Prof. Edamana Prasad Prof. Prathap Haridoss					
GENERAL GUIDELINES					
<ol style="list-style-type: none"> NPTEL is an acronym for National Programme on Technology Enhanced Learning which is an initiative by seven Indian Institutes of Technology (IIT Bombay, Delhi, Guwahati, Kanpur, Kharagpur, Madras and Roorkee) and Indian Institute of Science (IISc) for creating course contents in engineering and science. NPTEL is offering online certification courses through its portal - https://swayam.gov.in/nc_details/NPTEL Enrollment to courses and exam registration can be done in ONLINE mode only. The link is available on NPTEL website http://npTEL.ac.in/ Students need to enroll for the NPTEL course and clear the exam. In case students fail to get the certificate, they need to enroll for the same course once again, in the subsequent NPTEL semester and clear the exam. If the same course is not offered by NPTEL (i.e. if the same course is not re-run) in the subsequent semester by NPTEL, the students need to write letter seeking permission from the Counsellor, HoD and Dean Academics with further approval from BoS Committee to take alternative course from the list announced by NPTEL. Exam is conducted by NPTEL. 					

SEMESTER: II					
Course Code	:		DESIGN THINKING	CIE Marks	: 50
Credits L-T-P	:	0-0-2	(Practice)	SEE Marks	: 50
Hours/week	:	04		SEE Duration	: 2 Hours
UNIT - I					9 Hours
Empathy: The Empathy phases of the process are focused on understanding the experiences, emotions and motivations of others. Designers use specific empathy methods to learn more about the needs of the users for whom they are designing. Methods: Interviewing Probes and Observations					
UNIT - II					9 Hours
Define: The Define phase of the process is focused on developing a point of view about the need of your user. During this stage of process, designers narrow from lots of information to a statement that is inspiring and specific. Methods: Empathy Mapping, Point of View.					
UNIT - III					9 Hours
Ideate: The Ideate phase of the process is focused on generating as many solutions to a problem as possible. Once many solutions have been generated, students will select one to move forward to prototyping. Methods: Brainstorming and Selection					
UNIT - IV					9 Hours
Prototype: The Prototype phase is where designers construct representation of their solutions. These representations are intended to elicit feedback and answer specific questions about a concept. Methods: Improve, Rapid and Experiential Prototyping					
UNIT - V					9 Hours
Test: The Test phase of the process is focused on getting specific feedback about how ideas can improve. It is important to remember during this phase that prototypes are imperfect, but feedback is gift. Methods: Testing					
Course Outcomes: After going through this course the student will be able to:					
CO1	:	Learn to use different modes of thinking to understand the problem instead of finding answers/solutions for questions/problems			
CO2	:	Acquire adductive reasoning to find new problems			
CO3	:	Sow the seed of creativity to look for innovative solutions for a problem			
CO4	:	Adopt human centric approaches while developing new solutions, products or services.			

Guidelines for Design Thinking Lab:

1.	The Design Thinking Lab (DTL) is to be carried out by a team of two-three students.
2.	Each student in a team must contribute equally in the tasks mentioned below
3.	Each group has to select a theme that will provide solutions to the challenges of societal concern. The topics should be in line with the Sustainable Development Goals (SDG)
4.	The above five stages specified will be evaluated in three phases
5.	For every Phase of evaluation, the committee constituted by the department along with the coordinators would evaluate for CIE. The committee shall consist of respective coordinator & two senior faculty members as examiners. The evaluation will be done for each student separately.
6.	The team should prepare a Digital Poster and a report should be submitted after incorporation of any modifications suggested by the evaluation committee.

Scheme of Continuous Internal Examination (CIE)

The evaluation of the work will be done by the committee appointed by the director, Dept of MCA. The student should submit a report on the Case Study.

Evaluation will be carried out in THREE Phases.

Phase	Activity	Marks
I	Phase I	10
II	Phase II	15
III	Phase III	25

Scheme for Semester End Examination (SEE)

The evaluation will be done by Internal and External examiners. The following weightage would be given for the examination.

Written presentation of synopsis: Write up	05 Marks.
Presentation / Demonstration of the project Idea / Solution	15 Marks
Demonstration of the Prototype	20 Marks
Viva- Voce	05 Marks
Report	05 Marks

Curriculum Design Process

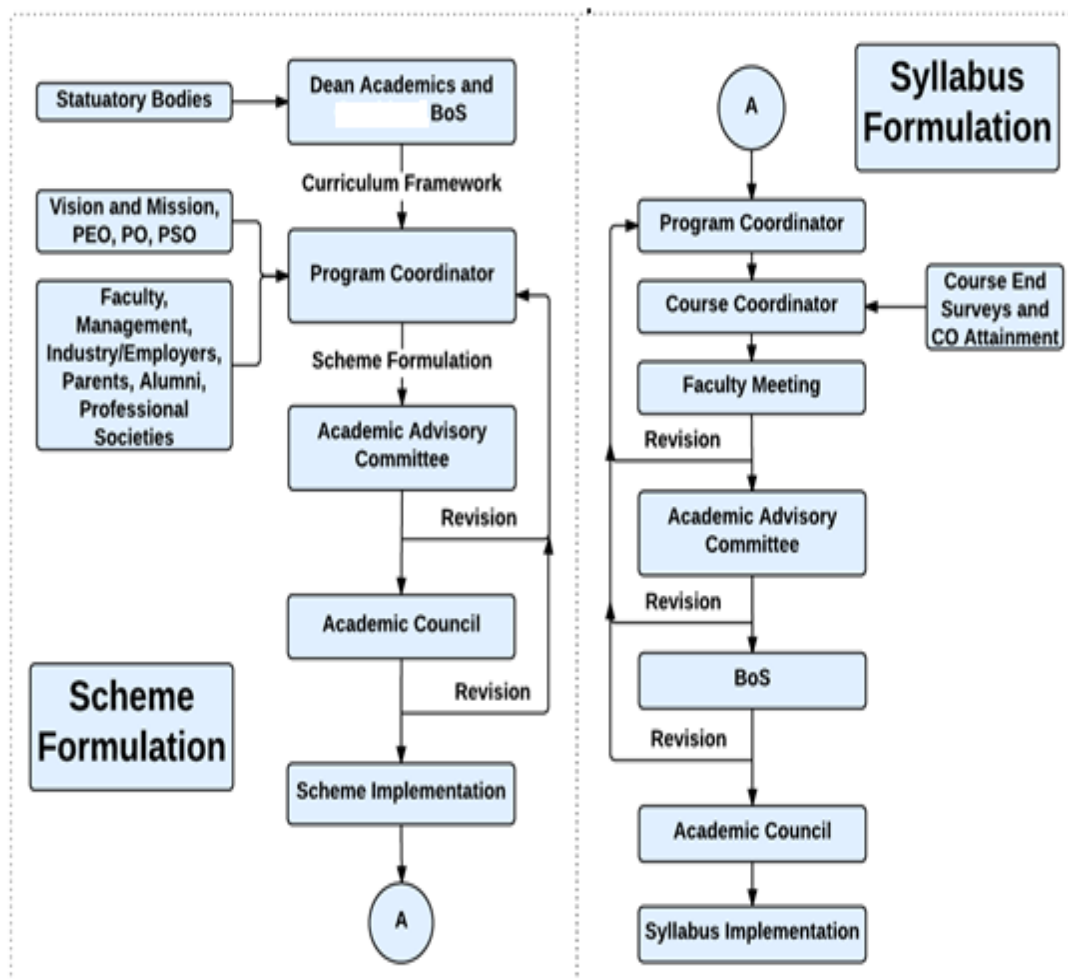

Figure 1: Curriculum Design Process

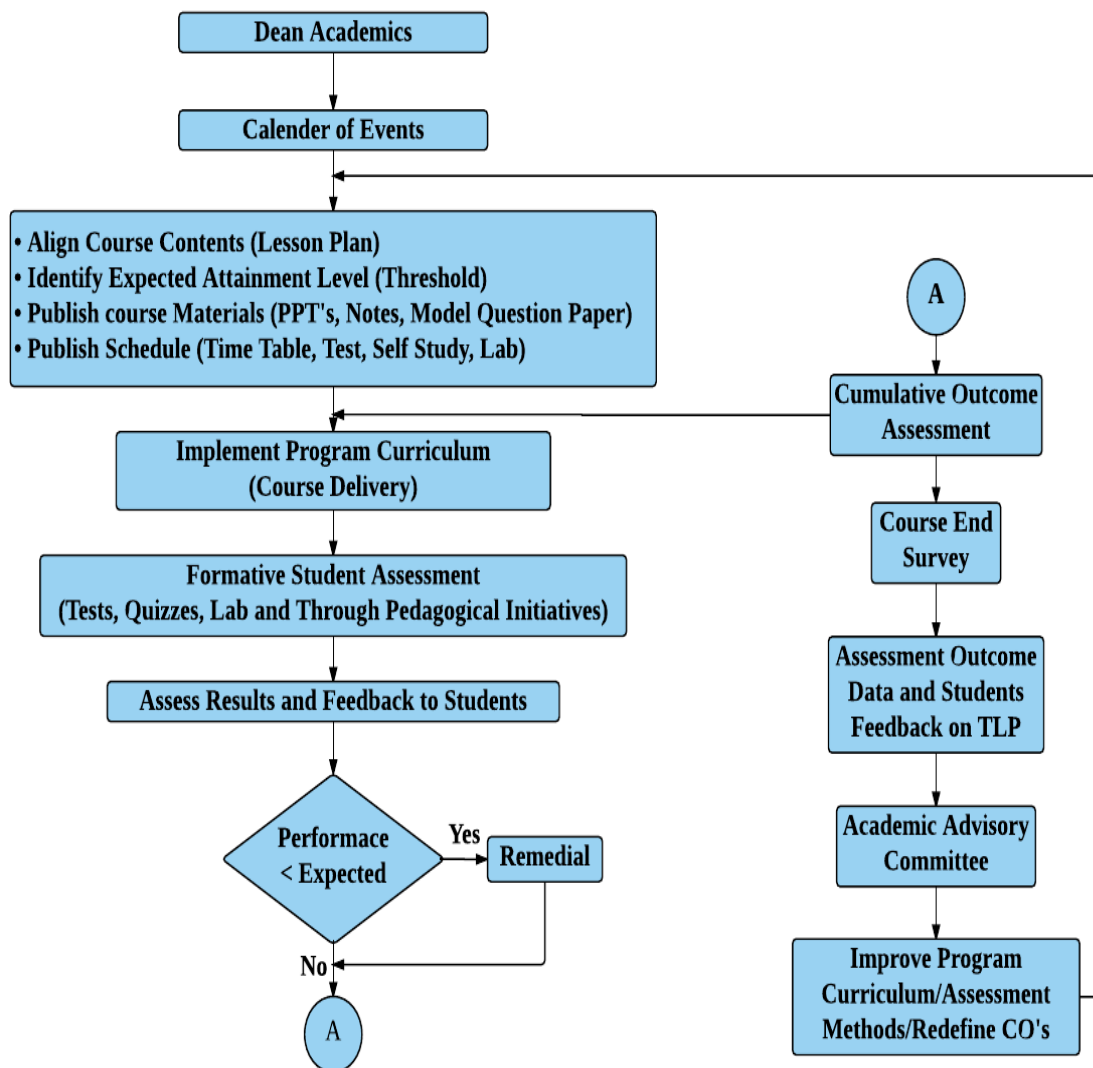

Figure 2: Academic Planning and Implementation

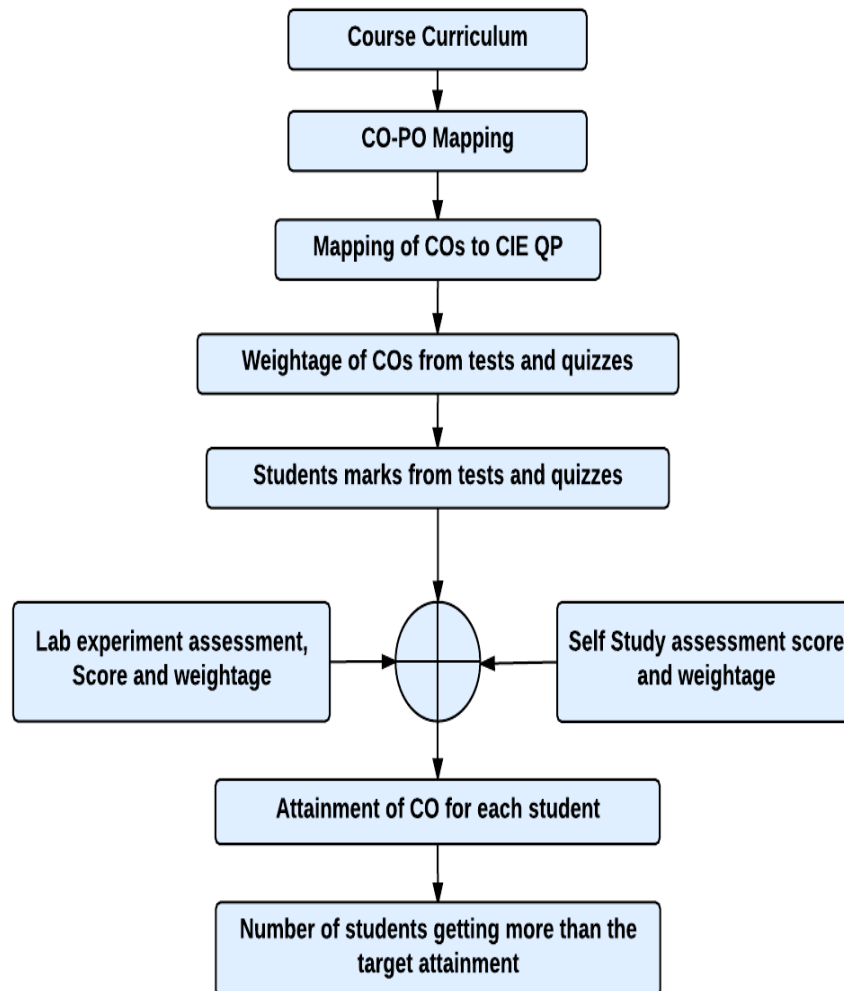

Figure 3: Process for Course Outcome Attainment

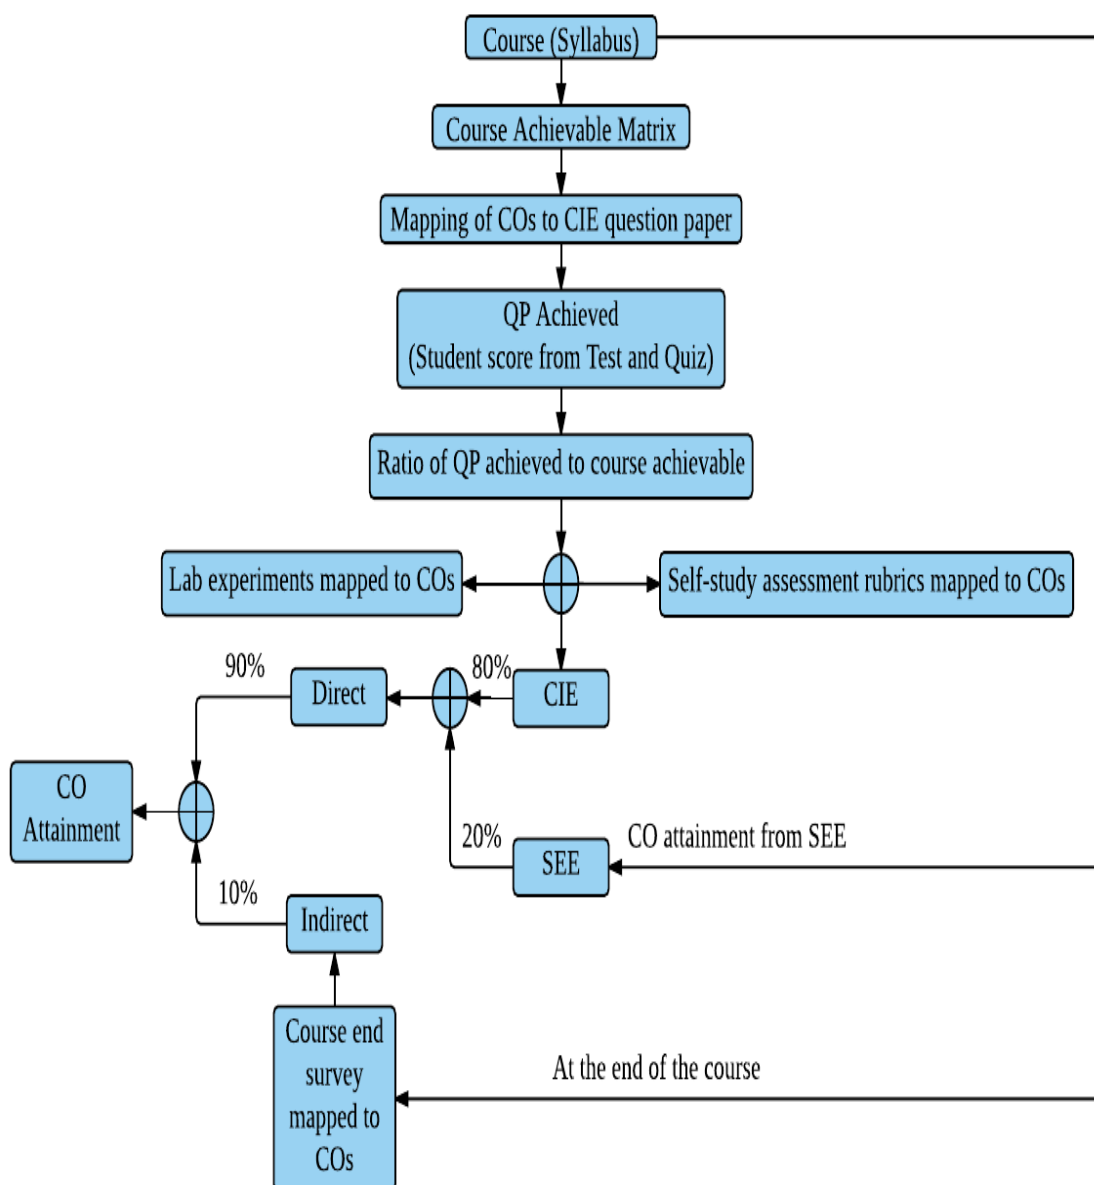

Figure 4: Final CO Attainment Process

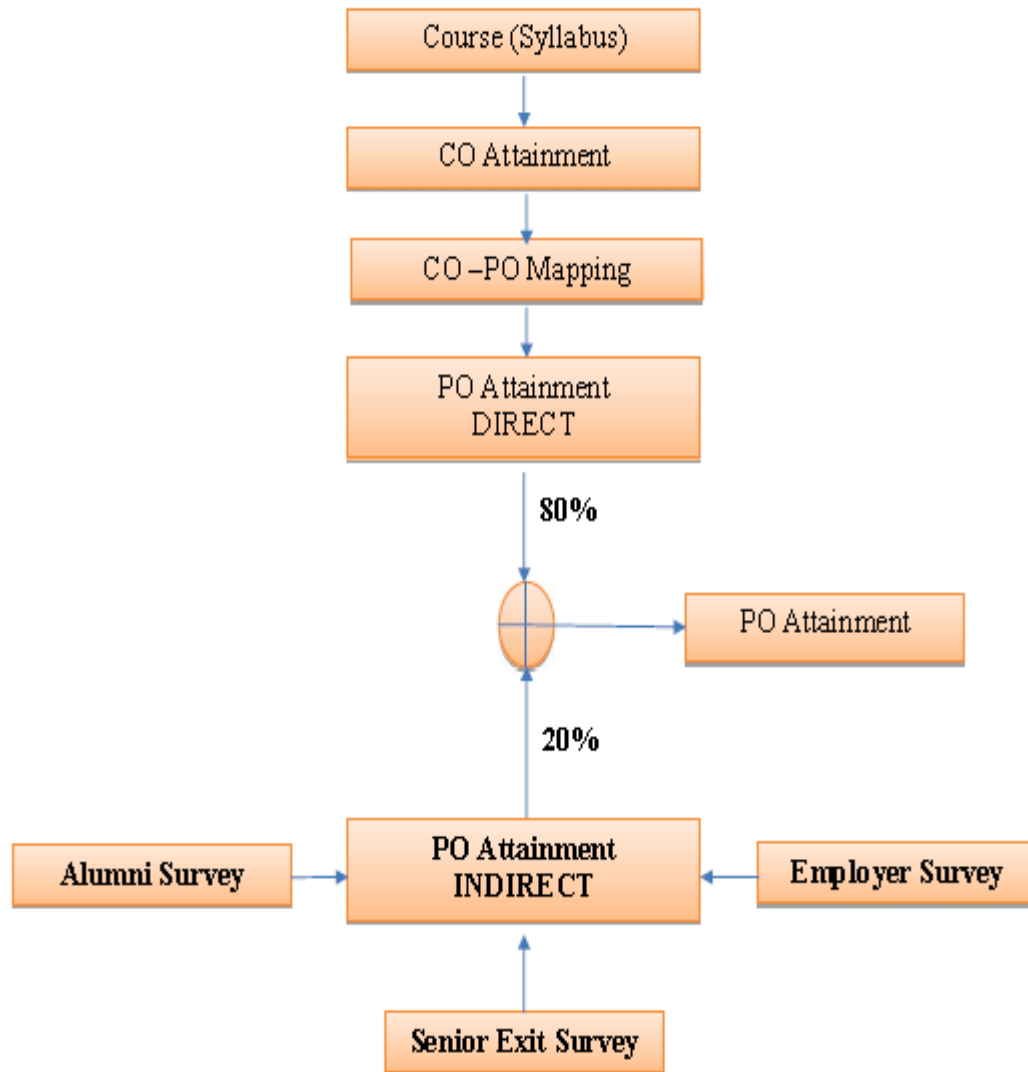

Figure 5: Program Outcome Attainment Process

PROGRAMME OUTCOMES (PO)

MCA Graduates will be able to:

- PO1 Foundation Knowledge:** Apply knowledge of mathematics, programming logic and coding fundamentals for solution architecture and problem solving.
- PO2 Problem Analysis:** Identify, review, formulate and analyze problems for primarily focusing on customer requirements using critical thinking frameworks.
- PO3 Development of Solutions:** Design, develop and investigate problems with as an innovative approach for solutions incorporating ESG/SDG goals.
- PO4 Modern Tool Usage:** Select, adapt and apply modern computational tools such as development of algorithms with an understanding of the limitations including human biases.
- PO5 Individual and Teamwork:** Function and communicate effectively as an individual or a team leader in diverse and multidisciplinary groups. Use methodologies such as agile.
- PO6 Project Management and Finance:** Use the principles of project management such as scheduling, work breakdown structure and be conversant with the principles of Finance for profitable project management
- PO7 Ethics:** Commit to professional ethics in managing software projects with financial aspects. Learn to use new technologies for cyber security and insulate customers from malware
- PO8 Life-long learning:** Change management skills and the ability to learn, keep up with contemporary technologies and ways of working.
